

KentuckyDefenseCounsel 2022 FALL SEMINAR, ANNUAL MEETING & AWARDS BANQUET

The **FALL SEMINAR** will include a **THURSDAY** seminar for **YOUNG LAWYERS**, and the **FRIDAY** seminar will be presented by **SAMUEL G. HODGE**, PhD, P.E. Temple University and Dispute Resolution Institute.

ABOUT OUR FRIDAY PRESENTER...

Sam Hodge teaches anatomy and the law with boundless enthusiasm. He is a skilled litigator who has taught medical topics for more than 25 years.

Musculoskeletal disorders are the largest category of workplace injuries and account for the majority of personal injury claims. Knowing the real mechanism of a back, shoulder or knee injury or what is and is not trauma related is crucial to your success as an advocate. In plain-English, and with a sharp focus on the challenges you face, Sam Hodge will keep you in stitches as he explains the nuances of the spine and upper and lower extremities in an easy to understand manner that will allow you to better evaluate or defend your case.

This entertaining and valuable journey will take you inside the human body through videos, illustrations and animations as you learn the parts of the body that are most susceptible to injury and those that are not. Professor Hodge, will explain how diagnosis are made and the particulars of medical tests and surgical procedure from the unique perspective of a very successful litigator and teacher.

- Learn how injuries to the spine, knee and shoulder really occur.
- Learn about muscles, ligaments, tendons and fascia.
- Find out the real difference between a sprain and a strain.
- Become comfortable with the anatomy of the musculoskeletal system.
- Find out how x-rays, Ct-scans and MRIs work as you read actual films.
- Experience what few attorneys have ever done by going into the anatomy lab and operating room to see what the body really looks like and how operations are performed.
